**The Service we provide:**

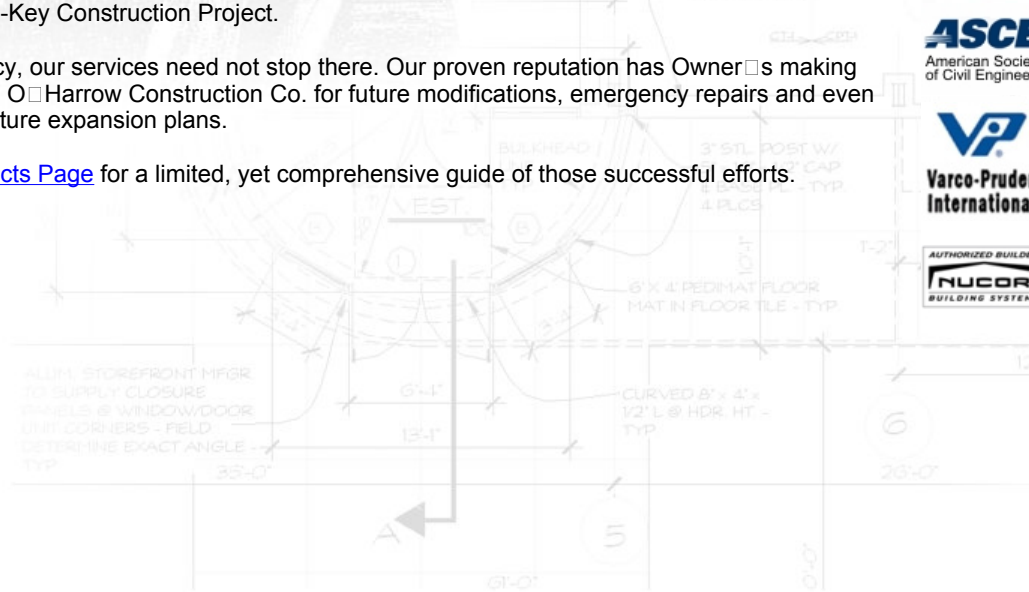

In any economic environment, time and knowledge is critical to an Owner's success. Our services offer streamlined expertise from the conceptual stages of a project through occupancy and beyond. Build to Suite and Lease Back opportunities are also available for specific Owner preferences.

Stressing open Owner communication throughout all phases of any size project, we initially offer full service design which includes project estimating, scheduling, site and building detailing, and permitting.

Our vast array of experienced construction personnel and modern equipment transitions any project from the design phase to the actual construction. Since 1948 our construction background has created unique skills for many different types of structures associated with the commercial, industrial, institutional and municipal building industries. Theses types of facilities may be conventional steel, concrete masonry or timber, as well as pre-engineered steel, but all have benifited from our time-honored construction and scheduling methods. Additionally, our steel fabrication shop produces connections and members for main frame structures to miscellaneous steel for such items as racks, canopies, mezzanines, stairs, etc to assist the owner to a more complete and truely Turn-Key Construction Project.

Upon receiving occupancy, our services need not stop there. Our proven reputation has Owner's making their next and only call to O'Harrow Construction Co. for future modifications, emergency repairs and even developing an owner's future expansion plans.

Please refer to [Our Projects Page](#) for a limited, yet comprehensive guide of those successful efforts.
